About Me

I am a student, pursuing my Computer Science degree and have an interest and experience in full stack development with modern tech. I'm a learner, geared up to examine any new tech that excites me!

Education

Thakur College of Engineering and Technology, Kandivali — 2019-2023
- Pursuing BE in Computer Science
- Current CGPI is 9.86

Higher Secondary School(12th) — 2018
- Completed HSC from Pragati College, Dombivali
- Passed with 96% marks(PCM aggregate)

Secondary School(10th) — 2016
- Completed my Secondary School from Omkar English School, Dombivali
- Passed with 94.20% marks

Skills

Programming Languages
- Python, JavaScript and C++

Tech Stack
- REACT.js, Next.js, Flask
- HTML, CSS, Javascript
- Node.js
- MERN STACK
- Docker

Database
- MySQL and MongoDB

Tools
- Postman
- VS Code

Certifications and Others

Code For Good - JPMC

Made it to the final Hackathon round of code for good - 2022 from more than fifty thousand participants.

Infosys Certification

Cleared the Infosys certification - 2022

Machine Learning Specialization

Machine Learning Specialization on Coursera from University of Washington

Work Experiences

Full Stack Developer - SecOps Solution (Sep, 2021 - Present)

- **Redesigned** the existing UI of the system and made it more appealing.
- **Integrated** third party applications like JIRA on the system
- **Developed** the APIs for the dashboard of the system in flask using **python** as programming language
- **Debugged** various previous bug present on the system

Projects

Dashboard Terminal to Document Stock Trades
- A full stack REACT application with Flask as backend to document trades with entry, exit, dates, chart Images, notes, etc. all in a seamless manner in just few clicks.
- Learned the user authentication system, session management, API building and database handling
- Complete Tech Stack: Flask, MongoDB, React

Social Media App using MERN Stack
- A full stack REACT application for creating and looking into other's travel memories.
- Learned the user authentication system, API building and database handling.
- Complete Tech Stack: REACT, Node, Express, MongoDB, Bootstrap

REST API for managing Electricity Bill Database
- A complete backend for maintaining the electricity bill database developed in Node Js.
- REST APIs were developed for various functionalities like pay bill, view bill, update bill, update user, etc.
- Complete Tech Stack: Node Js, Express, MongoDB

Social Media Mobile Application in Flutter
- A mobile application build using flutter where users can post there travel destinations and look at to others' travel memories.
- Learned MVVC software architecture
- Complete Tech Stack: Flutter, Dart, MongoDB
